

PAINT BOOTH GANTRY FOR RAILCAR PAINTING AND STENCILLING

SPECIALTY SOLUTION #139

TRANSPORTATION/RAIL

- 1,500 lb. capacity, mechanical actuation, 960"L x 24"W, 132" vertical travel
- Ergonomic, safe and efficient
- The platforms are electro-mechanically actuated using four screws and one drive which ensures level lifting and secure load holding at any height with zero creep
- Optional features include steel grating on platform floors, onboard control panel, onboard utilities access, cable reels, removable guard rails, auto-lube, fall arrest hook-ups and stairs

Handling Specialty can custom engineer and manufacture wall mounted lift platforms the railcar painting and stenciling process. Vertical travel, capacity, and overall platform size can all be varied to suit the exact specifications of any paint facility. Lifts can also be engineered and manufactured for Class 1 Div. 1 specifications (explosion proof).
